

HOLDER FOR TUBULAR HANDLEBARS

UNI CASE HOLDER 52

HANDLEBAR PHONE MOUNT FOR TUBULAR HANDLEBARS

Description

Universal water resistant Smartphone holder for motorcycles and bicycles. Secure and protected by a knock-proof case that's really sturdy, your Smartphone can follow you wherever you go - even on excursions outdoors. The holder is equipped with a mounting bracket that can be fixed on circular handlebars with a maximum diameter of 30 mm. Since the bracket is articulated, the holder can be tilted and turned in a number of ways, so it's comfortable and easy to use. It protects your mobile phone from impacts and harmful substances such as: water spray, dirt, dust and light rain. The clear front window made of special crystal film protects the phone, allows full use of the touch screen display and excellent reading. The double zip offers a practical system for threading earphone and power cables through the case and into the phone.
