

The Problem:

Unprotected motorcycle surfaces, like paint, plastic, aluminium, chrome, etc., will be unhand-some due to environmental impacts like rain, dirt, insects, ultraviolet rays, bird droppings, and so on.

The Solution:

**GLOSS
WAX
SPRAY**

NEW!
Carnauba Booster Technology

Product Advantages:

Long protection – Deep colour depth – Quick cleaning

- Using the new CARNAUBA BOOSTER TECHNOLOGY takes the features of the world's hardest wax and leads to fast and easy application
- Carnauba protects even longer against weather and environmental impacts. Allows water to run off
- Creates a strong mirror finish and brilliant colour depth
- Special combinations means quick cleaning without water, even cleaning from small oil dirts
- Good adherence on vertical surfaces, it doesn't run off

Applications:

All motorcycle surfaces, like paint, metal, plastic, chrome and so on, e.g. tank, slice, exhauster, etc.

- Do not use on wheels, seat and brakes

How to apply:

Shake well before use. Spray it on a soft cloth (or directly on the surface), bring it on smoothly. Let it dry for a while, wipe it off easily with a clean and soft cloth.

Tip:

Removes hard dirt with S100 Motorcycle Total Cleaner beforehand.
